

Business Requirements Document (BRD)

Project Name: Personal Portfolio Website – Naman Tiwari

Role: B.Tech 3rd Year Student

Version: 1.0

1. Project Overview

The objective is to develop a high-performance, responsive portfolio website that serves as a digital resume and project hub. The site must demonstrate Naman’s technical skills, academic achievements, and problem-solving capabilities to potential employers and peers.

2. Target Audience

- **HR Recruiters:** Looking for quick contact info and technical skills.
- **Technical Interviewers:** Looking for code quality, GitHub links, and project architecture.
- **Academic Mentors:** Looking for research interests and certifications.

3. Core Functional Requirements

- **Project Gallery:** Dynamic display of 3-5 major projects.
- **Blog/Insights:** Ability to post technical articles or "learning logs."
- **Responsive Design:** Flawless viewing on mobile, tablet, and desktop.
- **Downloadable Resume:** A direct button to fetch the latest PDF version of Naman’s CV.
- **Contact Integration:** Functional form with email notifications.

4. UI/UX Design & Components

To ensure a modern, high-end feel, the following UI components are required:

Component	Description
Hero Section	A clean landing area with a 3D avatar or professional photo and a "Typewriter Effect" for the bio (e.g., "I am a Developer
Sticky Navigation	Glassmorphism-style top bar with links to Projects, Skills, and Contact.

Skill Marquee	A horizontal scrolling marquee displaying tech logos (React, Python, AWS, etc.).
Project Cards	Hover-animated cards featuring project images, tech stacks, and "Live Demo" / "GitHub" buttons.
Bento Grid Layout	Used for the "About Me" or "Achievements" section to organize diverse info in a modern, tiled format.
Dark/Light Mode	A toggle switch to satisfy user preference.

5. Information Architecture

1. **Home:** Professional summary and primary Call-to-Action (CTA).
2. **Skills:** Categorized into Languages, Frameworks, and Tools.
3. **Experience/Education:** Vertical timeline of B.Tech journey and any internships.
4. **Projects:** Detailed case studies or simple cards.
5. **Contact:** Social links (LinkedIn, GitHub, Twitter) and an inquiry form.

6. Technical Stack (Recommended)

- **Frontend:** React.js or Next.js (for SEO and performance).
- **Styling:** Tailwind CSS (for rapid, modern UI building).
- **Animations:** Framer Motion (for smooth transitions).
- **Backend/Forms:** Formspree or EmailJS (to handle contact forms without a full server).
- **Deployment:** Vercel or Netlify.

7. Success Metrics

- **Loading Speed:** Under 2 seconds on mobile.
- **Lighthouse Score:** 90+ in Performance, Accessibility, and SEO.
- **Engagement:** Increase in LinkedIn profile views through the portfolio link.
